SCOPE OF WORK

- 1) Linear Path Scan: We understand the scope of work on this project is to search for underground utilities up to 10' to either side of the center line of linear paths totaling up to 1,000 LF.
- 2) We will attempt to trace any utilities for which structures are visible from the work area.
- 3) Utilities will be marked on the surface using paint, flags, or other appropriate means.
- 4) The client will be responsible for providing drawings or notifying GPRS of any utilities known to be entering the work area for which there are no apparent surface features or structures that are visible from the work area.
- 5) To avoid additional charges, the paths should be laid out, marked, and cleared of obstructions prior to our arrival.

Change Orders:

Change orders will be allowed only if unforeseen conditions arise such as, but not limited to, increasing or decreasing quantities or if the department needs dictate changes. All changes shall be in the scope of original work. No verbal change orders shall be permitted.
