**SUBJECT:** RTS Version 4.1.4 Release Notes

### PURPOSE

Attached are Release Notes of enhancements included in the Registration and Title System (RTS) Version 4.1.4 application that is scheduled for distribution in the upcoming weeks.

### DETAILS

RTS Version 4.1.4 contains the following enhancements to the software application:

- ◆ The new Print Immediate feature has been added to allow a clerk to determine when the transaction receipt will print.

The Server Plus feature will allow certain database functions to be performed at a workstation when Server Plus is enabled. A Publishing Report will now be available to provide the user with the status of offices publishing/subscribing between the main office and substations.
- ◆ Screen changes and additions will appear for the following: Void Transaction, Drivers Privacy Protection Act in DTA and Title, Special Plates, CCO Issue Date, and SSN Verification.
- ◆ There are several hot key changes.
- ◆ The barcoded copy for non-titled transactions has been eliminated and there will only be three receipts printed.
- ◆ The remark "Off-Highway Use" will now print on the CCO and the CCDO.
- ◆ House Bill 89 changes will be enabled in the Title event and disabled in the DTA event.

In this documentation, you will also find a table of fixed and staggered plates that will become effective July 22, 2000, as well as a list of 4.1.3 system corrections.
