RSPS Status Update Progress Bar

The problem associated with removing Flash Drives before completing updates has been eliminated. The application was enhanced to provide the user with a progress bar and a completion message. The progress bar is located on the **RSPS Status Update** (RSP001) screen. The progress bar will oscillate (back and forth) until the update is finished. At that point, a message appears informing the user "Flash Drive processing is complete. You may remove the Flash Drive."
