

## Registration Purposes Only (RPO) Transactions

Select "Registration Purposes Only" in the "Title Types TTL002" screen when correcting an RPO transaction. Under no circumstances should anyone select "Corrected" in the "Title Type TTL002" screen.

The screenshot shows a dialog box titled "Title Types TTL002" with a close button (X) in the top right corner. The text "RECORD FOUND" is displayed in red at the top. Below this, there is a section labeled "Select one:" containing four radio button options: "Original", "Corrected", "Registration Purposes Only", and "Non-Titled". A white arrow points to the "Registration Purposes Only" option, which is currently selected. Below the radio buttons is a section labeled "Check if applicable:" with a single checkbox option "Off-Highway Use", which is currently unchecked. At the bottom of the dialog box are three buttons: "Enter", "Cancel", and "Help".
